

# TOPAZ SIMPLIFY

## HOW TO INSTALL

### 32-bit Photoshop and Photoshop Elements (Windows)

Important:

The Simplify3\_setup.msi is the regular 32-bit required for both 32-bit and 64-bit Photoshop users. The Simplify3\_x64ext.msi – the 64-bit extension package only required for 64-bit Photoshop users.

To install Topaz Simplify for 32-bit:

1. Close Photoshop (or your other editing program)
2. Double-click on the Simplify3\_setup.msi file to launch the installation wizard. Please follow the on-screen commands by agreeing to the licensing terms and clicking "Next" all the way through in order to install Simplify into the default location.
3. Open and image in Photoshop and go to Filter -> Topaz Labs and select Simplify. If you forgot to close Photoshop before installing Simplify you will need to restart it before you can access Simplify. If you do not see Simplify listed in your Filter menu, please open up My Computer and go to C: \ Program Files \ Topaz Labs \ Simplify 3 \ Plug-ins and copy the "tliSimplify3ps.8bf" file and put it into your Photoshop plug-ins folder. You can access your Photoshop plug-ins folder here: C: \ Program Files \ Adobe \ Photoshop \ Plug-ins. If there is already a topazSimplify3 shortcut file in the plug-ins folder, please delete it. After that, please restart Photoshop and you will be able to access Topaz Simplify 3.

### 64-bit Photoshop CS4 (Windows)

To install Topaz Simplify for 64-bit CS4 and 64-bit Windows XP / Vista:

1. Complete steps 1 and 2 from above.
2. Double-click on the Simplify3\_x64ext.msi file to launch the 64-bit extension installation wizard. Please follow the on-screen commands and it will automatically install Topaz Simplify for 64-bit Photoshop.
3. Restart Photoshop if it was open and then access Simplify from your Filter menu.

### Photoshop CS3, CS4 and Elements 6-8 (Mac)

Go to your Apple Menu and select "About this Mac" to verify that your Mac has an Intel CPU. Topaz Simplify will not run on non Intel-based Macs (PowerPC's) or anything below Photoshop CS3 or Elements 6. Also, make sure that you are NOT running Photoshop in Rosetta. If you are, you will need to disable Rosetta before you can use Simplify.

To install Topaz Simplify:

1. Close Photoshop (or your other editing program)
2. Double-click on the Simplify3\_install launch the installation wizard. Please follow the on-screen commands by agreeing to the licensing terms and clicking "Next" all the way through in order to install Simplify into the default location.
3. Open and image in Photoshop and go to Filter -> Topaz Labs and select Simplify. If you forgot to close Photoshop before installing Simplify you will need to restart it before you can access Simplify. If you do not see Simplify listed in your Filter menu, please open up your Macintosh HD then navigate to Library -> Application Support -> Topaz Labs -> Simplify 3 -> Plug-ins. Plug-ins and copy the "tliSimplify3" file and put it into your Photoshop plug-ins folder. You can access your Photoshop plug-ins folder here: HD -> Applications -> Photoshop -> Plug-ins. If there is already a topazSimplify3 shortcut file in the plug-ins folder, please delete it. After that, please restart Photoshop and you will be able to access Topaz Simplify 3.

If you have Photoshop installed in a non-default location you will need to follow the directions in step 3 to manually add Simplify to your Photoshop plug-ins.
